The importance of Microsoft courses

Under the scheme of Naan Mudhalvan, many students of our Trinity College for Women, Namakkal, are interested in learning Microsoft-related courses apart from the university curriculum.

These life-skill-oriented courses started by the Tamil Nadu Skill Development Corporation during the academic year 2022-2023.

For the past two academic years, we have conducted the following Microsoft-related programmes for the benefit of our students:.

1. Microsoft Word

2. Interview Skills

3. Resume Building

4. LinkedIn Profile Management and Searching

5. Data privacy and cybersecurity

6. Emerging technologies and digital payments

7. Tools of Artificial Intelligence for Designs

8. Using CHATGPT 2

9. Use of AI with MS Word, MS Excel, and MS PowerPoint

10. Other tools of AI and security with AI

Data Analytics & Visualization (Powered by Tableau) - Course Content

1. **Course objectives:** The main objectives of the course is to prepare the students to become skillful by doing hands on project based learning in the real time environment. Also making them to become industry /job - ready

2. **Course outcomes:** To gain hands on working skills and industry project experience by learning & Hands-on-with Tableau Platform,Data Extraction using Database & Flat files,Working with Metadata and Data Blending,Working with Filters,Organizing Data & Visual Analytics,Working WIth Mapping ,Calculations,Expressions & Parameters,Use the Tableau Analytics interface/paradigm to create powerful Visualizations, Dashboards & Story effectively,Represent data using various visualization types,Build a web application using flask web framework & Build a number of use cases in multiple domains such as Financial Services, Insurance, Retail, Ecommerce, Telecom, Agriculture, Aviation etc.

3. **Prerequisite:**
    Skills Required: Basic Knowledge of Data Analysis & Database
    System Requirement:
        Hardware Requirements: 4GB RAM,Processor- Intel core i3/M1 OS-Windows/Linux/MAC
        Software Requirements: Tableau,MySQL Workbench,Spyder/VsCode (IDE)

Module	Session duration	Session/Module Name	Topics
1	3 Hours	Introduction to Business Intelligence	Business Intelligence Data Integration Data Processing Data Presentation ETL Architecture Introduction to Data Analytics. Types of Data Analytics. Descriptive Analytics Diagnostic Analytics Predictive Analytics Prescriptive Analytics Analytics & Applications
2	2 Hours	Introduction to Tableau	Introduction to tableau Overview & Features Connecting Tableau to Data Sources Working with Flat files Connecting spreadsheets
3	3 Hours	Data Extraction	Introduction to Database Creating Database & Table CRUD Operation on database tables Basic SQL Operations
4	1 Hour	Architecture of Tableau	Architecture of Tableau Interface of Tableau (Layout, Toolbars, Data Pane, Analytics Pane, etc.) Tableau field types Saving and publishing a data source Live vs extract connection Various file types Ways to share and export the work done in Tableau **Hands-on Exercise:** 1. Play with Tableau desktop 2. Learn about the interface 3. Share and export existing works
5	4 Hours	Data Visualization	Charts:- Histograms Box plot Motion Pie Bar Line Bubble Bullet Scatter Tree Heat maps Maps Text table Highlighted table

6	4 Hours	Working with Metadata and Data Blending	Connecting to Data Source Tableau data types Connection to Excel Cubes and PDFs Management of metadata and extracts Data preparation Joins (Left, Right, Inner, and Outer) and Union Dealing with NULL values, cross-database joining, data extraction, data blending, refresh extraction, incremental extraction, how to build extract, etc. cross-database joining Data blending **Hands-on Exercise:** 1. Connect to Excel sheet to import data 2. Use metadata and extracts 3. Manage NULL values 4. Clean up data before using 5. Perform the join techniques 6. Execute data blending from multiple sources
7	4 Hours	Advanced Data Manipulations	Preview Mark and highlight Groups Sets (creating and editing sets, IN/OUT) Constant sets Computed sets Combined sets Bins Hierarchies Sorting and Types Using the Formatting pane to work with the menu, fonts, alignments, settings, etc. Editing axes and annotations **Hands-on Exercise:** 1. Use marks to create and edit sets 2. Highlight the desired items 3. Make Groups 4. Apply sorting on results 5. Make hierarchies among the created sets
8	6 Hours	Working with Filters,Organizing Data & Visual Analytics	Working with Filters Filters (addition and removal) Filtering continuous dates, dimensions, and measures Filtering in Tableau Types of filters Filtering the order of operations **Hands-on Exercise:** 1. Use the data set by date/dimensions/measures to add a filter 2. Use interactive filter to view the data 3. Customize/remove filters to view the result Organizing Data and Visual Analytics Preview K-means cluster analysis Trend and reference lines Visual analytics in Tableau Forecasting, confidence interval, reference lines, and bands **Hands-on Exercise:** 1. Apply labels and tooltips to graphs, annotations, edit axes' attributes 2. Set the reference line 3. Perform k-means cluster analysis on the given dataset

9	3 Hours	Working WIth Mapping ,Calculations and Expressions	Working on coordinate points Plotting longitude and latitude Editing unrecognized locations Customizing geocoding, polygon maps, WMS: web mapping services Working on the background image, including add image Plotting points on images and generating coordinates from them Map visualization, custom territories How to create map projects in Tableau **Hands-on Exercise:** 1. Plot longitude and latitude on a geo map 2. Edit locations on the geo map 3. Custom geocoding 4. Use images of the map and plot points 5. Find coordinates Calculation syntax and functions in Tableau Various types of calculations, including Table, String, Date, Aggregate, Logic, and Number Quick table calculations The creation of calculated fields
10	2 Hours	Working with Parameters	Creating parameters Parameters in calculations Using parameters with filters Column selection parameters Chart selection parameters How to use parameters in the filter session How to use parameters in the reference line **Hands-on Exercise:** 1. Creating new parameters to apply on a filter 2. Passing parameters to filters to select columns 3. Passing parameters to filters to select charts
11	5 Hours	Dashboards and Stories	What is a dashboard? Building and formatting a dashboard using size, objects, views, filters, and legends Best practices for making creative as well as interactive dashboards using the actions Creating stories Including the intro of story points Creating as well as updating the story points Adding catchy visuals in stories Adding annotations with descriptions; dashboards and stories Highlight actions, URL actions, and filter actions Selecting and clearing values Dashboard examples using Tableau workspace and Tableau interface **Hands-on Exercise:** 1. Create a Tableau dashboard view, include legends, objects, and filters 2. Make the dashboard interactive 3. Use visual effects, annotations, and descriptions to create and edit a story
12	3 Hours	Build Tableau Web Application	Introduction to Flask Working with Flask Framework Building application with flask framework Embedding Dashboard & Story with web application

NAAN MUDHALVAN COURSE
FUNDAMENTALS OF DATA ANALYTICS WITH TABLEAU

The Computational intelligence for employability – Fundamentals of Data Analytics with Tableau was assigned under Naan Mudhalvan Scheme for the III year students of Mathematics. Every IV day order two hours were allotted to handle the classes for the III year students. The Mathematics Department faculty, Mrs.S.MADHUKARAVENI handled the Fundamentals of Data Analytics with Tableau class for the III year students of Mathematics department. The main objectives of the course is to prepare the students to become skillful by doing hands on project based learning in the real time environment and making them to become industry/job-ready.

Students were gained hands on working skills and industry project experience by learning & Hands on with Tableau-Platform. Data Extraction using Database & Flat files, working with Metadata and Data Blending, Working with filters, Organizing Data & Visual Analytics, Working with Mapping, Calculation, Expressions &Parameters, Use the Tableau Analytics-interface/Paradigm to create powerful Visualizations.

Data Analytics & Visualization (Powered by Tableau) - Course Content

Course objectives and learning outcomes

1. **Course objectives:** The main objectives of the course is to prepare the students to become skillful by doing hands on project based learning in the real time environment. Also making them to become industry /job - ready

2. **Course outcomes:** To gain hands on working skills and industry project experience by learning & Hands-on-with Tableau Platform,Data Extraction using Database & Flat files,Working with Metadata and Data Blending,Working with Filters,Organizing Data & Visual Analytics,Working WIth Mapping ,Calculations,Expressions & Parameters,Use the Tableau Analytics interface/paradigm to create powerful Visualizations, Dashboards & Story effectively,Represent data using various visualization types,Build a web application using flask web framework & Build a number of use cases in multiple domains such as Financial Services, Insurance, Retail, Ecommerce, Telecom, Agriculture, Aviation etc.

3. **Prerequisite:**
   Skills Required: Basic Knowledge of Data Analysis & Database
   System Requirement:
      Hardware Requirements: 4GB RAM,Processor- Intel core i3/M1 OS-Windows/Linux/MAC
      Software Requirements: Tableau,MySQL Workbench,Spyder/VsCode (IDE)

Module	Session duration	Session/Module Name	Topics
1	3 Hours	Introduction to Business Intelligence	Business Intelligence Data Integration Data Processing Data Presentation ETL Architecture Introduction to Data Analytics. Types of Data Analytics. Descriptive Analytics Diagnostic Analytics Predictive Analytics Prescriptive Analytics Analytics & Applications
2	2 Hours	Introduction to Tableau	Introduction to tableau Overview & Features Connecting Tableau to Data Sources Working with Flat files Connecting spreadsheets
3	3 Hours	Data Extraction	Introduction to Database Creating Database & Table CRUD Operation on database tables Basic SQL Operations
4	1 Hour	Architecture of Tableau	Architecture of Tableau Interface of Tableau (Layout, Toolbars, Data Pane, Analytics Pane, etc.) Tableau field types Saving and publishing a data source Live vs extract connection Various file types Ways to share and export the work done in Tableau **Hands-on Exercise:** 1. Play with Tableau desktop 2. Learn about the interface 3. Share and export existing works
5	4 Hours	Data Visualization	Charts:- Histograms Box plot Motion Pie Bar Line Bubble Bullet Scatter Tree Heat maps Maps Text table Highlighted table

6	4 Hours	Working with Metadata and Data Blending	Connecting to Data Source Tableau data types Connection to Excel Cubes and PDFs Management of metadata and extracts Data preparation Joins (Left, Right, Inner, and Outer) and Union Dealing with NULL values, cross-database joining, data extraction, data blending, refresh extraction, incremental extraction, how to build extract, etc. cross-database joining Data blending **Hands-on Exercise:** 1. Connect to Excel sheet to import data 2. Use metadata and extracts 3. Manage NULL values 4. Clean up data before using 5. Perform the join techniques 6. Execute data blending from multiple sources
7	4 Hours	Advanced Data Manipulations	Preview Mark and highlight Groups Sets (creating and editing sets, IN/OUT) Constant sets Computed sets Combined sets Bins Hierarchies Sorting and Types Using the Formatting pane to work with the menu, fonts, alignments, settings, etc. Editing axes and annotations **Hands-on Exercise:** 1. Use marks to create and edit sets 2. Highlight the desired items 3. Make Groups 4. Apply sorting on results 5. Make hierarchies among the created sets
8	6 Hours	Working with Filters,Organizing Data & Visual Analytics	Working with Filters Filters (addition and removal) Filtering continuous dates, dimensions, and measures Filtering in Tableau Types of filters Filtering the order of operations **Hands-on Exercise:** 1. Use the data set by date/dimensions/measures to add a filter 2. Use interactive filter to view the data 3. Customize/remove filters to view the result Organizing Data and Visual Analytics Preview K-means cluster analysis Trend and reference lines Visual analytics in Tableau Forecasting, confidence interval, reference lines, and bands **Hands-on Exercise:** 1. Apply labels and tooltips to graphs, annotations, edit axes' attributes 2. Set the reference line 3. Perform k-means cluster analysis on the given dataset

9	3 Hours	Working WIth Mapping ,Calculations and Expressions	Working on coordinate points Plotting longitude and latitude Editing unrecognized locations Customizing geocoding, polygon maps, WMS: web mapping services Working on the background image, including add image Plotting points on images and generating coordinates from them Map visualization, custom territories How to create map projects in Tableau **Hands-on Exercise:** 1. Plot longitude and latitude on a geo map 2. Edit locations on the geo map 3. Custom geocoding 4. Use images of the map and plot points 5. Find coordinates Calculation syntax and functions in Tableau Various types of calculations, including Table, String, Date, Aggregate, Logic, and Number Quick table calculations The creation of calculated fields
10	2 Hours	Working with Parameters	Creating parameters Parameters in calculations Using parameters with filters Column selection parameters Chart selection parameters How to use parameters in the filter session How to use parameters in the reference line **Hands-on Exercise:** 1. Creating new parameters to apply on a filter 2. Passing parameters to filters to select columns 3. Passing parameters to filters to select charts
11	5 Hours	Dashboards and Stories	What is a dashboard? Building and formatting a dashboard using size, objects, views, filters, and legends Best practices for making creative as well as interactive dashboards using the actions Creating stories Including the intro of story points Creating as well as updating the story points Adding catchy visuals in stories Adding annotations with descriptions; dashboards and stories Highlight actions, URL actions, and filter actions Selecting and clearing values Dashboard examples using Tableau workspace and Tableau interface **Hands-on Exercise:** 1. Create a Tableau dashboard view, include legends, objects, and filters 2. Make the dashboard interactive 3. Use visual effects, annotations, and descriptions to create and edit a story
12	3 Hours	Build Tableau Web Application	Introduction to Flask Working with Flask Framework Building application with flask framework Embedding Dashboard & Story with web application

Data Analytics with Tableau

COURSE OBJECTIVE

- Fundamentals of Business Intelligence, including data integration, processing, andpresentation
- Gain proficiency in using Tableau for data visualization and analysis.
- Learn how to extract data from databases and perform CRUD operations using SQL.
- Learn how to clean & prepare the data with Tableau prep builder
- Explore the architecture of Tableau and understand its interface, field types, and datasource management
- Develop skills in creating various types of visualizations and charts using Tableau
- Learn advanced techniques such as data blending, advanced data manipulations,filtering, and creating interactive dashboards and stories using Tableau.

COURSE OUTCOMES	
On completion of the course, students will be able to:	
CO1 :	Learn about basics of business intelligence, data extraction & data analysis, you willalso become proficient in interface of different tableau products
CO2 :	Data preparation Skills : With the help of tableau prep builder you will understand howto clean and prepare the raw data, so that it can be used for gaining insights
CO3 :	Data Visualization skills: you will learn how to create different data visualizations and customize them. you will also learn how to gain insights from different data visualizations
CO4 :	Data manipulation skills: you will learn how to manipulate data, apply different filtersand parameters to get the desired output
CO5 :	Dashboard and Analytics Skills: you will learn how to create custom interactive dashboards with tableau to analyze data, gain insights, and track key performance metrics, enabling data-driven decision-making.

Understand the concept of Business Intelligence - Explain the process of data integration, processing, and presentation - Familiarize with ETL (Extract, Transform, Load) architecture - Gain an introduction to data analytics and its types - Understand descriptive, diagnostic, predictive, and prescriptive analytics-Explore the applications of analytics in business.

Introduction to Tableau :
Introduction to tableau-Overview & Features–Connecting Tableau to Data Sources - Working
with Flat files-Connecting spreadsheets

Data Extraction:
Understand the fundamentals of databases and their role in data management **-** Learn how to create databases and tables for data storage **-** Develop skills in performing CRUD (Create, Read, Update, Delete) operations on database tables - Gain a basic understanding of SQL operations for data extraction and manipulation

Architecture of Tableau :
Gain knowledge of the architecture of Tableau and how it functions - Explore the interface of Tableau, including layout, toolbars, data pane, and analytics pane - Understand different Tableau field types and their usage - Learn how to save and publish data sources in Tableau - Differentiate between live and extract connections in Tableau - Explore various file types and ways to share and export work done in Tableau

UNIT-II	Tableau Prep Builder	05 hours

What is Tableau Prep ? - Installing Tableau Prep- Tableau Prep Interface - Basics of DataPreparation - Connecting to Data

Creating Data Flows:
The Input Step - The profile pane - The cleaning step - Group & replace - The output step - Thepivot step & calculated fields - The aggregate step - The union step - The join step

UNIT-III	Data Visualization & Data Blending	05 hours

Understand different chart types for data visualization, including histograms, box plots, pie charts, bar charts, line charts, bubble charts, bullet charts, scatter plots, tree maps, heat maps, maps, text tables, and highlighted tables - Learn how to create effective visualizations using Tableau

Working with Metadata & Data Blending:
Connect to different data sources in Tableau - Gain an understanding of Tableau data types - Learn how to connect to Excel, cubes, and PDFs in Tableau - Manage metadata and extracts in Tableau.- Master joining techniques such as left, right, inner, and outer joins, as well as union operations - Explore data blending and data preparation techniques in Tableau

UNIT-IV	Advanced Data Manipulations & Filters	08 hours

Learn advanced techniques for marking and highlighting data points - Understand how to groupdata and create sets in Tableau - Explore bins, hierarchies, and sorting options in Tableau - Utilize the formatting pane for menu, font, alignment, and other settings - Edit axes and annotations in Tableau

Working with Filters, Organizing Data & Visual Analytics :
Gain proficiency in working with filters in Tableau - Learn different types of filters and how to add or remove them - Explore filtering techniques for continuous dates, dimensions, and measures - Understand the order of operations in filtering data - Learn techniques for organizing data and conducting visual analytics in Tableau.

Working With Mapping ,Calculations and Expressions :
Gain proficiency in working with filters in Tableau - Learn different types of filters and how to
add or remove them - Explore filtering techniques for continuous dates, dimensions, and

measures - Understand the order of operations in filtering data - Learn techniques for organizing data and conducting visual analytics in Tableau

Working With Mapping ,Calculations and Expressions :
Work with coordinate points and plot longitude and latitude data on maps in Tableau - Edit unrecognized locations and work with background images in Tableau - Understand map visualization and custom territories in Tableau - Learn calculation syntax and functions in Tableau. - Create calculated fields and utilize quick table calculations

Working with Parameters :
Gain knowledge of creating parameters in Tableau **-** Understand how to use parameters in calculations - Learn how to incorporate parameters with filters in Tableau

UNIT-V	Dashboards & Stories	04 hours

Build and format interactive dashboards using Tableau, incorporating various elements such as size, objects, views, filters, and legends - Apply best practices for creating visually appealing and engaging dashboards that effectively convey insights and support decision-making - Understand the concept of story points in Tableau and utilize them to create compelling data narratives - Create and update story points, combining visualizations, annotations, and descriptions to tell a coherent data story - Enhance stories and dashboards with catchy visuals and captivating design elements - Implement actions in dashboards, including highlight actions, URL actions, and filter actions, to enhance interactivity and user experience - Learn techniques for selecting and clearing values within dashboards - Explore dashboard examples using Tableau workspace
and interface, gaining practical insights into effective dashboard design and layout

Estimation of Business Expenses

This report delves into the fascinating realm of business expenses and provides a visual exploration of the various expenditures incurred by different businesses. It showcases the distribution of expenses, identifies key cost drivers, and highlights areas of potential optimization or concern. The visual representations allow for intuitive analysis, facilitating a deeper understanding of expenditure patterns and their implications for business performance. Decision-makers, financial analysts, and stakeholders can gain valuable insights into the financial health of businesses, identify areas of inefficiency or opportunity, and make informed decisions to optimize resources and drive growth. To Extract the Insights from the data and put the data in the form of visualizations, Dashboards and Story we employed Tableau tool.

Technical Architecture:
Project Flow

To accomplish this, we have to complete all the activities listed below,

- Define Problem / Problem Understanding
    - Specify the business problem
    - Business requirements
    - Literature Survey
    - Social or Business Impact.
- Data Collection & Extraction
    - Collect the dataset
    - Connect Dataset with Tableau
- Data Preparation
    - Prepare the Data for Visualization
- Data Visualizations
    - No of Unique Visualizations
- Dashboard
    - Responsive and Design of Dashboard
- Story
    - No of Scenes of Story
- Performance Testing
    - Amount of Data Rendered to DB
    - No of Calculation Fields
    - No of Visualizations/ Graphs
- Web Integration
    - Dashboard and Story embed with UI With Flask
- Project Demonstration & Documentation
    - Record explanation Video for project end to end solution
    - Project Documentation-Step by step project developmentprocedure

Milestone 1: Define Problem / Problem Understanding

Activity 1: Specify the business problem

Refer Project Description

Activity 2: Business requirements

The primary business requirements for this report are to visualize and analyze business expenses, provide industry-specific insights, identify cost drivers, highlight outliers, and offer interactive functionality. Stakeholders need a visual representation of expenses to compare and analyze spending patterns across different businesses and industries. The report should facilitate the identification of key cost drivers, enabling stakeholders to understand the primary factors contributing to expenses. Additionally, it should flag any outliers or anomalies for further investigation.

Activity 3: Literature Survey

Cost drivers were a significant focus in the literature survey, with researchers extensively investigating the factors influencing business expenses. Studies highlighted labour costs, material costs, overhead expenses, and marketing expenditures as key drivers. Accurately identifying and tracking these drivers was emphasized as essential for effective expense management and control.

The role of technology in expense analysis emerged as a significant theme. Researchers underscored the utilization of advanced data analytics tools and techniques, including data visualization platforms like Tableau, to enhance expense analysis and reporting.

These technologies enable businesses to gain deeper insights into their spending patterns, identify trends, and make data-driven decisions for cost optimization.

Overall, the literature survey revealed a rich body of knowledge on business expenses, covering cost analysis methodologies, cost drivers, benchmarking approaches, and the role of technology. These insights serve as a foundation for our subsequent analysis and visualization of expenses in this report.

Activity 4: Social or Business Impact.

Social Impact: The analysis of business expenses and financial management has a significant social impact. It contributes to economic stability by optimizing costs and fostering long-term sustainability. Effective expense management creates job opportunities and supports the workforce. It allows for better resource allocation, enabling businesses to invest in innovation and community engagement. Responsible expense management aligns with societal expectations and promotes social responsibility. Non-profit organizations benefit from expense analysis, enabling them to maximize their impact. Overall, analysing and managing expenses positively influences economic growth, employment, stakeholder well-being, and social responsibility.

Business Impact: Analysing business expenses has a profound impact on various aspects of business operations. It helps optimize costs, improve profitability, and ensure financial stability. Expense analysis enables businesses to allocate resources effectively, make informed decisions, and create realistic budgets and forecasts. It enhances competitiveness, attracts investors, and mitigates financial risks. By understanding and managing expenses, companies can drive growth, maintain a strong financial position, and make strategic business decisions with confidence.

Milestone 2: Data Collection & Extraction

Data collection is the process of gathering and measuring information on variables of interest, in an established systematic fashion that enables one to answer stated research questions, test hypotheses, evaluate outcomes and generate insights from the data.

Activity 1: Downloading the dataset

Please follow link to download:

https://drive.google.com/drive/folders/1CCxjo561-uTwp260h-YbAj9jurbEcXcB?usp=drive_link

Activity 1.1: Understand the data

Data consists of 33 rows which correspond to 33 different business types and 29 columns that correspond to different operating expenses.

Column Description of the Dataset:

naics_code : Unique code given to each business type

Business_types : Different Business Types present (33)

operating_expenses : Total Operating expenses

annual_payroll : Total yearly payment

employer_cost : Amount spent on employees

employer_costs_health_insurance : Amount spent on health insurance for employees

employer_costs_contribution_plans : Amount spent on retirement plans for employees

employer_costs_pension_plans : Amount spent on pension plans for employees

employer_costs_benefits : Amount spent to provide various benefits to the employees

contract_labor_costs : Amount spent on contract labourers

expensed_equipment_amount : Amount spent on equipment

packaging_materials_and_containers: Amount spent on packaging

parts_and_supplies_not_for_resale: Amount spent on necessary parts and supplies not for sale

purchases_of_software: Amount spent to purchase software

data_processing_and_computer_services: Amount spent to computer services

commission_expense_amount : Amount spent on commissions given to employees based on their performance

communication_services: Amount spent on transmission and reception of data.

repairs_and_maintenance_of_equipment : Amount spent on repairs and maintenance

maintenance_of_buildings_offices: Amount spent on maintenance of buildings

rental_payment_for_machinery: Amount spent on leasing machinery

rental_payments_for_buildings_offices: Amount spent on leasing buildings for offices

electricity: Amount spent on electricity

water_sewer_and_other_utility: Amount spent on water sewer treatment

transportation_shipping_warehousing: Amount spent on transport, shipping and warehousing.

advertising_and_promotional_services: Amount spent on advertising

professional_and_technical_services: Amount spent on technical services

depreciation_and_amortization: Amount of depreciation

taxes_and_license: Amount spent on taxes and licenses

Activity 2: Connect Dataset with Tableau

https://drive.google.com/file/d/1ds1VqgE8oz_wuyz9Ql0SyFCMlZG_kDKj/view?usp=sharing

Milestone 3: Data Preparation

Activity 1: Prepare the Data for Visualization

Preparing the data for visualization involves cleaning the data to remove irrelevant or missing data, transforming the data into a format that can be easily visualized, exploring the data to identify patterns and trends, filtering the data to focus on specific subsets of data, preparing the data for visualization software, and ensuring the data is accurate and complete. This process helps to make the data easily understandable and ready for creating visualizations to gain insights into the performance and efficiency.

Milestone 4: Data Visualization

Data visualization is the process of creating graphical representations of data to help people understand and explore the information. The goal of data visualization is to make complex data sets more accessible, intuitive, and easier to interpret. By using visual elements such as charts, graphs, and maps, data visualizations can help people quickly identify patterns, trends, and outliers in the data.

Activity 1: No of Unique Visualizations

The number of unique visualizations that can be created with a given dataset. Some common types of visualizations that can be used to analyse the performance and efficiency of banks include bar charts, line charts, heat maps, scatter plots, pie charts, Maps etc.

Milestone 5: Dashboard

A dashboard is a graphical user interface (GUI) that displays information and

data in an organized, easy-to-read format. Dashboards are often used to provide real-time monitoring and analysis of data and are typically designed for a specific purpose or use case. Dashboards can be used in a variety of settings, such as business, finance, manufacturing, healthcare, and many other industries. They can be used to track key performance indicators (KPIs), monitor performance metrics, and display data in the form of charts, graphs, and tables.

Activity 1: Responsive and Design of dashboard

Once you have created views on different sheets in Tableau, you can pull them into a dashboard.

Activity 1.1 : Dashboard 1

Explanation video link:

https://drive.google.com/file/d/1ilXcVzRN8v8fKrozXHso91FjQx5R2vVw/view?usp=drive_link

Activity 1.2 : Dashboard 2

Explanation video link:

https://drive.google.com/file/d/1TKKkHNjzJxwnxbuncrAs7ylQ__m-8Xgz/view?usp=drive_link

Activity 1.3 : Dashboard 3

Explanation video link:

https://drive.google.com/file/d/1vSxXRGQlFYF4QDTHbcOCUTJoe_WvfCIa/view?usp=drive_link

Milestone 6: Story

A data story is a way of presenting data and analysis in a narrative format, intending to make the information more engaging and easier to understand. A

data story typically includes a clear introduction that sets the stage and explains the context for the data, a body that presents the data and analysis logically and systematically, and a conclusion that summarizes the key findings and highlights their implications. Data stories can be told using a variety of mediums, such as reports, presentations, interactive visualizations, and videos.

Activity 1: Number of scenes in a story

The number of scenes in a storyboard for a data visualization analysis of the performance of banks will depend on the complexity of the analysis and the specific insights that are trying to be conveyed. A storyboard is a visual representation of the data analysis process and it breaks down the analysis into a series of steps or scenes.

Activity 1.1 : Story 1

Explanation video link:

https://drive.google.com/file/d/1zB2ETpZy9W-5yTy7vWOKLcbgTdes7fYS/view?usp=drive_link

Activity 1.2 : Story 2

Explanation video link:

https://drive.google.com/file/d/1qtuyfzh_Mq3-nJjr48EMshguNYURIUt1/view?usp=drive_link

Milestone 7: Performance Testing

Activity 1: Amount of Data Rendered to Tableau

- The amount of data that is rendered to a Tableau depends on the size of the dataset

Activity 2: Number of calculation fields
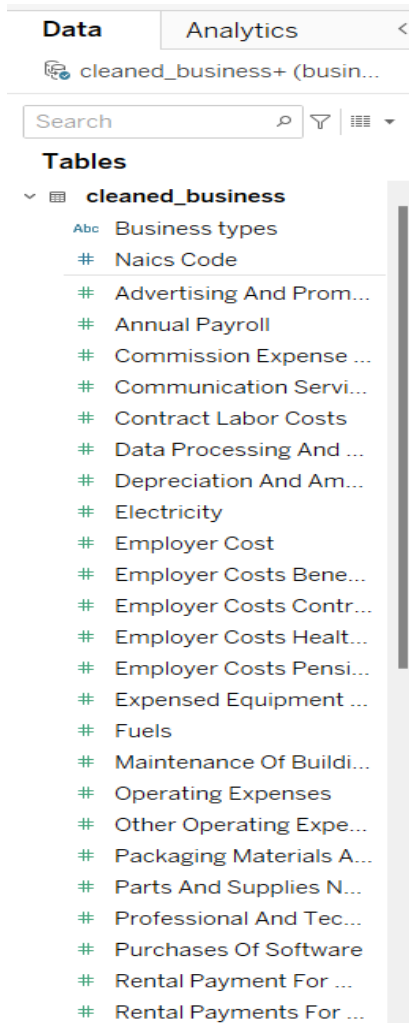

Activity 3: Number of visualizations

1. Annual PayRoll
2. Advertisement Cost
3. Contract Labour vs Employee
4. Employee(Insurance vs pension)
5. Equipment Costs
6. Expenses YoY
7. Fuel
8. Maintenance of Buildings

9. Power Expenditure
10. Rental Payment
Machinery 11. Taxes &
Licenses 12. Transportation

Milestone 8: **Publishing helps us to track and monitor key performance metrics and to communicate results and progress. help a publisher stay informed, make better decisions, and communicate their performance to others.**

Publishing dashboard and reports to tableau public

Step 1 : Go to data Source and Select Extract so that .hyper extension files are created and save it at your desktop.
(please wait for pop up of file to save)
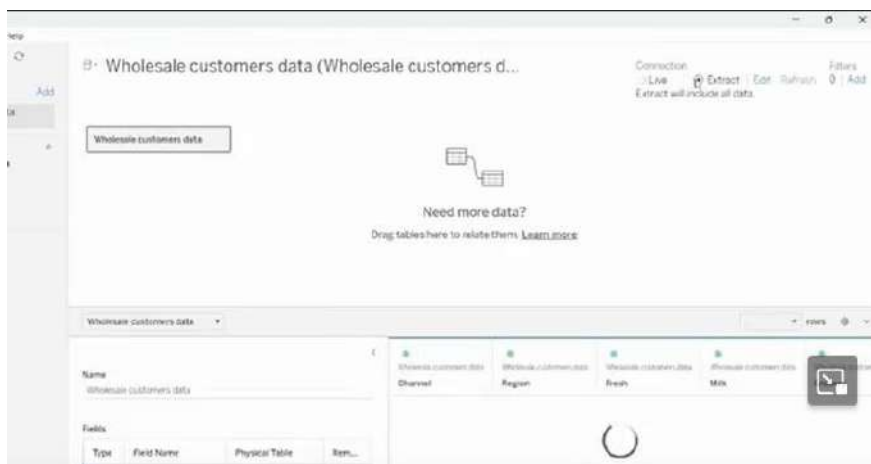

Step 2: Go to Dashboard/story, click on share button on the top ribbon
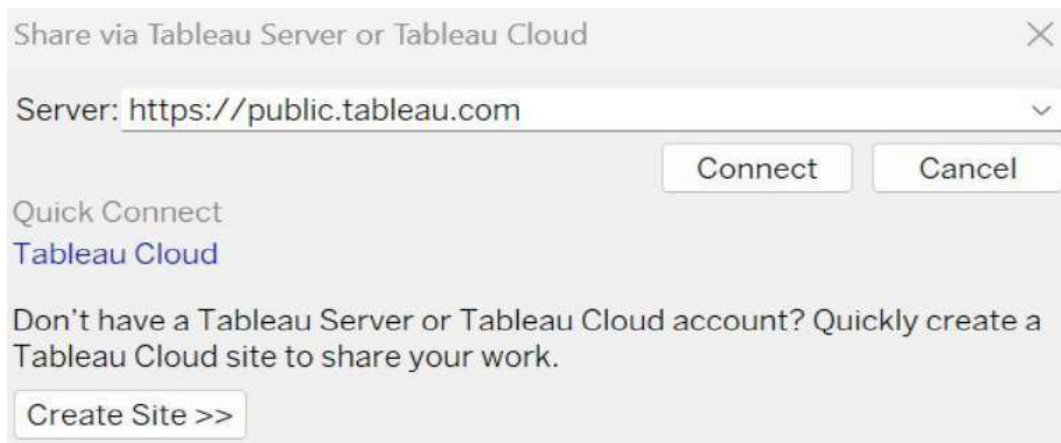

Give the server address of your tableau public account and click on connect.
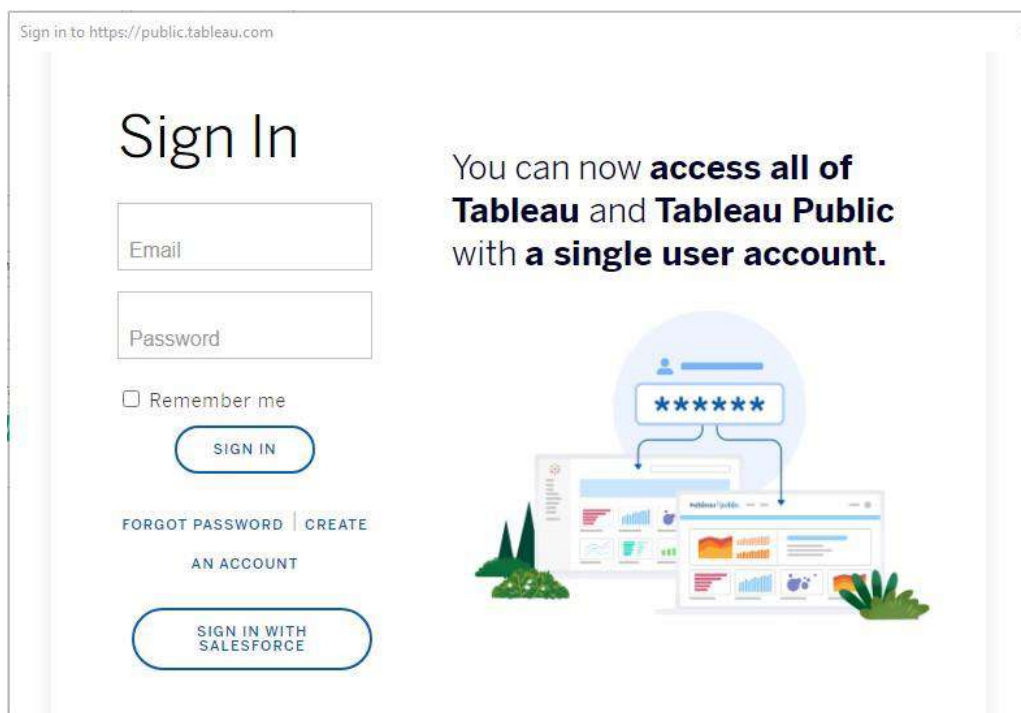

Sign in to your Tableau Public account or create a new account if you don't have one. You can visit the Tableau Public website (public.tableau.com) and click on the "Sign In" or "Join" button.

In the "Tableau Public Sign In" window, enter your Tableau Public account credentials and click "Sign In."

Next, you'll need to provide a title and description for your workbook. Fill in the appropriate details in the provided field of workbook Title
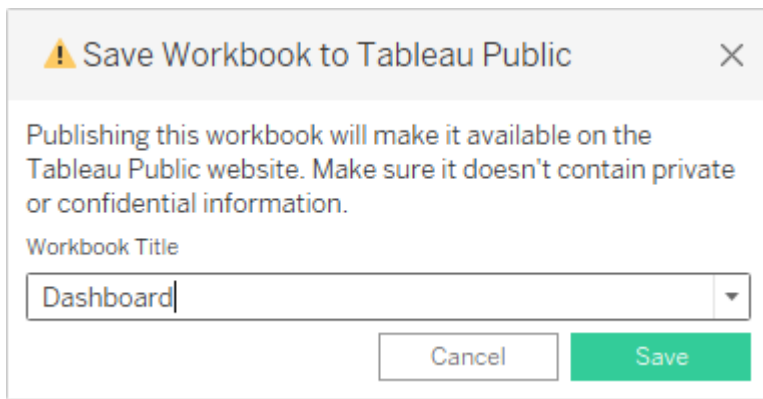

Click on the "Save" button to start the publishing process. Tableau Desktop will upload your workbook to Tableau Public.

Once the upload is complete, a browser window will automatically open, displaying your published workbook on Tableau Public. Review the workbook to ensure that everything appears as expected.

So in Similar way we can also publish Story to tableau public.

Milestone 9: Project Demonstration & Documentation

Below mentioned deliverables to be submitted along with other deliverables.

Activity 1: Record explanation Video for project end to end solution

Activity 2: Project Documentation-Step by step project development procedure

Create a document as per the template provided.

COURSEOBJECTIVE

TheobjectiveofthiscourseistoprovideaninsightintotheArtificialIntelligencedomainandt hevarious applications. It also lays focus on the generative AI / GPT which is the order of the day.This course introduces Artificial intelligence to learners using various use cases and real lifeexamples. It also provides a brief overview of the various aspects of AI and delves deeper intovarious Machine learning concepts that form the fundamental building blocks. The course alsointroducesdeeplearningtechniques,howcomputervisionusesAIandtheAI-Firststrategyintheindustry.Learnersalso getapointofviewoftheethicsto befollowedand howpromptengineeringhasemergedaspartofgenerative AI.

UNIT-I	IntroductiontoArtificialIntelligence	7hours
Introduction to Artificial Intelligence(AI)- Need – The What of AI- Types – Introduction tosupervised/unsupervisedlearning,reinforcementlearning-Timeseriesforecasting-AIarchitecture--ApplicationsofAI(Business–Retail,banking,Energy,manufacturing),-AIin platforms,Autoencoders,Vision		
UNIT-II	IntroductiontoDeepLearning	5hours
Deep Learning - Evolution and Business Potential - Introduction to Artificial Neural Network - Convolution Neural – Networks Recurrent Neural Networks – Autoencoders - Deep Learning &Business-DeeplearningFrameworksandProducts-CourseSummary-Self-Assessment-Deep Learning
